Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1614

Claims 26-41 are presented for examination.

Applicants' amendment filed August 26, 2002 has been received and entered.

Priority

Acknowledgment is made of applicant's claim for foreign priority based on an application filed in PCT/US00/02079 on 1/27/200. It is noted, however, that applicant has not filed a certified copy of the said application as required by 35 U.S.C. 119(b).

Double Patenting

Claims 26-41 are again rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,329,343. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application is claiming a bioadhesive composition comprising a film forming agent, pyruvate, an antioxidant, and a mixture of saturated and unsaturated fatty acid adapted to resuscitate injured mammalian cells; and the patented application is again claiming a bioadhesive composition comprising a film forming phase, pyruvate, an antioxidant, and a mixture of saturated and unsaturated fatty acid while the film forming phase comprising pullulan. N

Art Unit: 1614

Note the present application's film forming agent is selected from a Markush group containing pullulan. The present application further comprising additional additives such as an anesthetic agent and an anti-microbial agent. Note the patented application specification located in column 4, lines 36-64 teaches the addition of "pharmaceutically active agents" which includes anesthetic agents and anti-microbial agents along with others as set forth in present application claims 40 and 41. Clearly, the one skilled in the art would have been motivated to add the additional "pharmaceutically active agents" to the now patented bioadhesive composition to formulate the instant bioadhesive composition of the present application in the absence of evidence to the contrary.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321© may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

Art Unit: 1614

provided the conflicting application or patent is shown to be commonly owned with this application.

See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26-41 are not allowed.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
